- ✓ Network Design, Implementation, and Support of Data, Voice, and Wireless Networks
- ✓ Cyber Security, System Integration and Data Center
- ✓ Cloud Strategy, Migration, and New Deployment (Hybrid, AWS/Azure)
- ✓ VMware and Microsoft Design, Implementation and Support

Government Client Examples

FLORIDA ARMY NAVY GUARD (FLARNG)

Migrated Cisco Access Control Server to Cisco Identity Services Engine and provide a testbed for different types of network devices (router, switch, and wireless controller). Provided configuration for AAA Authentication and 802.1x Authentication for network switches.

Developed configuration for FLARNG in preparation for Security Technical Implementation Guide (STIG) audit. Devices included routers, switches, wireless controllers and voice network. Provided and documented end points change for selected devices and knowledge transfer.

NATIONAL PARK SERVICE, NATIONAL CAPITOL REGION (NPS)

Migrate current Cisco Unified Communications with new voice gateways, edge routers, switches and new Cisco VoIP Phone by configuring the Call Managers with dial-plans, auto-attendant, interoffice dialing, local and international dialing. Configure all extensions and voicemails for all users. Provide systems administration and end user training.

CITY OF SAN JOSE

Developed High Level and Low-Level network documentation and migration plan for the City of San Jose to upgrade their surveillance video systems at 13 different connected nearby agencies. Included systems requirement at each agency for the new video surveillance cameras and systems that allow the City of San Jose to be able to view all agencies cameras and other agencies to share video cameras with each other.
